GALAPAGOS ISLANDS

GALAPAGOS MULTI-SPORT

by BIKE, SEA KAYAK, SNORKEL AND FOOT

10-DAYS

The Galápagos Islands are a living laboratory of evolution. The hot and frigid currents that meet at the Equator have produced an incredibly rich and unique diversity in the marine life. There are no predators, so the animals are friendly. It's literally possible to walk right up to blue-footed boobies, lava lizards, equatorial penguins, sea lions and pink flamingos without them scurrying off in fear. On BikeHike's 10-day Galapagos adventure we travel far from the crowds and cruises and view the islands from a very different perspective. We bob through the ocean surf by sea kayak, paddling alongside giant sea turtles, seals and bottle-nosed dolphins. Inland we whisk along dirt trails on bikes and our own two feet. We've built in plenty of time for snorkelling in the turquoise waters and for the certified, scuba diving is available as an optional activity (please note if you scuba dive you will miss a day of activity).

Day 1

ARRIVAL QUITO

A BikeHike Adventures representative will meet you upon arrival and transfer you to a comfortable hotel in downtown Quito. The remainder of the day is free to explore the city and acclimate to this high altitude city, located at 2,800 meters/9,300 feet.

Day 2

QUITO - SANTA CRUZ ISLAND

KAYAKING

In the morning, we'll transfer back to the airport to connect with our flight to the Galapagos Islands, located 625 miles/1,000 km off the coast of mainland Ecuador. After landing on Baltra Island, we'll head by vehicle and ferry to our hotel in the quiet, charming harbour town of Puerto Ayora on Santa Cruz Island. In the afternoon, we'll go kayaking and navigate around Divine Bay and Punta Estrada, paddling through multiple lava channels of calm, turquoise waters. Within the channels, white-tipped sharks and sting-rays patrol beneath the waves, while colonies of blue-footed boobies, tropic birds, herons and marine iguanas perch along the jagged cliffs. The evening is free in Puerto Ayora to relax or sample the local nightlife, liveliest on the weekends. **(B,L,D)**

Day 3

SANTA CRUZ ISLAND - ISABELA ISLAND

HIKING

After a hearty breakfast in our hotel, we'll shuttle up to the humid tropical parts of the island to visit the giant Galapagos turtles living in the wild here. After lunch, we'll take a speedboat (2.5 hour ride) to the town of Puerto Villamil where we'll visit the turtle breeding centre and walk through a dry forest, lava fields, mangroves and salty lagoons that are a refuge for flamingos, white-cheeked pintails and common stilts. Isabela is the largest island in the Galapagos archipelago and was formed by six main volcanoes. All of these volcanoes except one remain active, making this island one of the most volcanically active places on earth. Overnight at hotel. **(B,L,D)**
